QUAN	DESIGN	NAME											
1	3020	2x4 plate											
2	41769	2x4 Left wing											
2	41770	2x4 Right wing											

This simple Lego Bow Tie shows one way to use 'wing' elements to make other common shapes. Using these same parts, an hourglass or a diamond can be created.

Any size or color of these parts can be used to create the same effect. Humorous bow ties can be created by using mixed colors or two different size wing elements. Be creative and have fun!
